## THE PATH TO SUCCESS

TargetCW has many benefits designed especially for managing internship and co-op programs in the U.S. and overseas. Aside from being the legal W-2 employer, we have several unique benefits to assist both the student and Client Company. We offer Fortune 500-class benefits as well as service and convenience features designed specifically for internships and co-ops.

TargetCW utilizes a paperless online enrollment process for same day onboarding of workers. Co-ops and interns also receive an end of assignment letter which can be used at educational institutions or for future employers. The end of assignment letter can also be accompanied by evaluation surveys from the student's supervisors at the Client Company. Both provide the student with the prestige and satisfaction of completing the co-op or internship program. TargetCW eases the administration burden and liability of employing co-ops and interns through a seamless process for both Clients and students.
